The **academicons** package
High quality icons of online academic profiles

Diogo A. B. Fernandes*(LaTeX code)
James Walsh (font and icons design)

Version 1.4, released on May 28, 2015

Abstract

The **academicons** package provides specific (LA)TEX bindings with the free *Academicons* font, allowing to access 20 high quality icons of online academic profiles.

1 Description

The **academicons** package provides access in (LA)TEX to 20 high quality icons of online academic profiles included in the free *Academicons* font. This package requires the **fontspec** package and either the XƎ(LA)TEX or Lua(LA)TEX engine to load the included `academicons.ttf` font.

The *Academicons* font was designed by James Walsh and released[1] under the open SIL Open Font License[2]. This package is a redistribution of the free *Academicons* font with specific bindings for (LA)TEX. It is inspired and based on the **fontawesome**[3] package.

2 Usage

`\aiicon` — The **academicons** package provides the generic `\aiicon` command to access icons, which takes as mandatory argument the ⟨*name*⟩ of the desired icon. It also provides individual direct commands for each specific icon. The full list of icons and their respective names and direct commands can be found below. For example, `\aiicon{googlescholar}` yields the same result as `\aiGoogleScholar`.
